

H Function

[Wersja polska](#)

[English version](#)

$H(x)$ equals to sum of all digits of x . Moreover, if $H(x) > 9$ then $H(x) = H(H(x))$.

Input

The first line of the standard input contains one integer t ($t < 100001$) - the number of test cases.

In each of the next t lines there is one number x ($x < 10^6$).

Output

For each test You have to print $H(x)$.

Example

Input:

```
2
1
5
```

Output:

```
1
3
```
